

Nine Steps to Success...

The Eden Group's 9 Step Corporate Growth Cycle is a proven and progressive road map for developing successful, sustainable and profitable corporate growth.

Chief Executives who complete the 9 Step Corporate Growth Cycle will:

- Gain new pertinent knowledge that results in a successful corporate growth outcome; and
- Achieve true long term profitability.

Continued growth is essential for a company to maintain market share, realize economies of scale, new channels for investment and attract talented executives, managers and employees. Strong sales growth alone is not a good indicator of profitability and market share.

“The journey to achieving a successful corporate growth outcome is the catalyst for personal, professional, financial and spiritual growth... becoming profitable is the objective”.
